Bohemian *crafted* since 1548

UPDATED OCTOBER 2019

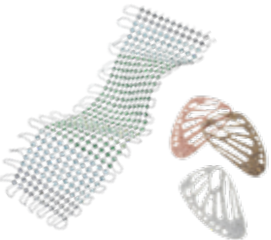

The *Story* of Bohemian Crystal

Preciosa's glassmaking heritage can be traced back to the 16th century when in 1548 the first glass kiln was ignited deep within the heart of a scenic, mountainous region of Northern Bohemia known affectionately today as Crystal Valley. It was here in the dozens of ateliers and workshops scattered throughout the region that an emerging industry grew into a globally recognized trade. Exactly four centuries later in 1948, two dozen of the valley's most established glassworks joined together to form Preciosa, the world's finest producer of Bohemian crystal.

Application

For best results, Crystal Faerie should be applied by a professional nail technician. Crystal Faerie was designed for external use on finger or toe nails, and should be applied on top of nail polish, gel or professional glue. Do not use with other types and/or conventional glue. Please note that exposure to UV rays will not affect Crystal Faerie's shine or durability.

1. Apply first coat of nail polish or gel and allow to dry completely.

2. One nail at a time, apply second coat of nail polish, gel or professional glue. Hold that finger over a small tray and sprinkle Crystal Faerie over the painted, still-wet nail.

3. Gently press and compact the crystals onto the nail and let it dry completely. We recommend using a cosmetic or nail brush to shape the crystals into the desired formation.

4. Apply a light, top coat around the edges of the crystals for maximum durability.

5. Pour remaining Crystal Faerie from the small tray back into the bottle for future applications.

Removal

To remove Crystal Faerie, use nail polish remover or recommended remover for gel nail lacquer.

WARNING: This product is not suitable for children under 12, as ingesting small parts may present a choking hazard. It is intended for decorative purposes only and should not be used as a toy.

STORAGE CONDITIONS: Store in a dry cool place.

Coatings

The special multilayer treatment is permanent and able to sustain cast-in-place production techniques and cleaning processes as long as predefined methods are maintained.

Foiling

Foiling is the application of a reflective layer on the underside of the stone to create maximum brilliance. Foiled stones are perfectly suitable for gluing because they do not lose their optical characteristics.

NOTE:

* Preciosa's patented Permanent Color Treatment (PCT) technology opens up a range of exciting new possibilities in the coloration and durability of cubic zirconia. Developed according to the latest discoveries in material science, our innovative color application process creates a uniform, permanent colored layer across the stone's pavilion. Our PCT stones are able to sustain cast-in-place production techniques and cleaning processes such as ultrasound, magnetic pin and acid baths. Our selection of PCT colors are part of our regular assortment of colors and coatings for cubic zirconia.

NOTE:

* Permanent Color Treatment and Coating is available only for Cubic Zirconia

Cubic Zirconia

Suitable for lost-wax casting

The man-made answer to natural diamonds, cubic zirconia boasts perfect structure, extreme hardness and incredible light dispersion. Made with only the highest quality, inclusion-free rough, Preciosa Cubic Zirconia is cut to a variation tolerance of ± 0.01 mm and every facet is individually polished to give these stones an even brighter fire than their naturally occurring counterpart.

Laser Engraving

In an ever-expanding market full of choices, each with a more competitive price than the next, assurance of quality and responsible business practices is becoming increasingly more difficult to verify. Preciosa's laser engraving service for fine jewelry stones not only combats counterfeiting and ensures best-in-class quality, but also serves as proof that each laser-engraved stone was responsibly crafted in the Czech Republic according to EU legislation.

A regular feature of our Alpha-cut (Round Brilliant) stones, our laser-engraved Preciosa logo is undetectable to the naked eye. The laser engraving service is also completely customizable and applicable to any fine jewelry stone—regardless of shape, size or color—upon special request.
