STICKY CRYSTAL

BY **PRECIOSA CRYSTAL COMPONENTS**

Brought to you directly from the Crystal Valley, STICKY CRYSTAL by PRECIOSA Crystal Components is a completely new and unique way of creating crystal designs with premium crystal components. Easy to use and surprisingly affordable, it can quickly transform any surface and object into an elegantly sparkling work of art.

Working together, **G.S.M. from Italy and PRECIOSA from the Czech Republic** developed a product that changes the way crystal applications are designed, created, and used. Now, when you wish to crystallize your product, you no longer have to tediously attach one stone at a time. Sticky Crystal by PRECIOSA Crystal Components is an innovative adhesive crystal technology that allows you to apply your entire design at once: simply and perfectly every single time.

And, because it can be applied to virtually any surface, crystal is no longer limited to just the fashion industry. Now you can add crystal's luxurious sparkle to practically anything including: jewellery and accessories, furniture & lifestyle products, packaging, beauty and health products, sports, high-tech, office supplies, kitchen and cooking accessories, and food & beverage products. The sky is truly the limit!

PRODUCT FEATURES

1 A UNIQUE PRODUCT

Sticky Crystal by PRECIOSA Crystal Components is a true revolution in crystal decorating technology. It is a ground-breaking and unique self-adhesive product made with your choice of colours and sizes of the popular PRECIOSA MC Chaton VIVA 12® HF. It assures perfect, uniform and flawless adhesion, allowing objects to be precisely, quickly and consistently decorated. The application was designed and patented by Preciosa's Authorised Distributor, G.S.M., an Italian crystal design company, based on over twenty years of their experience in the world of high fashion and crystal components.

2 PREMIUM QUALITY

Sticky Crystal by PRECIOSA Crystal Components is a premium product that meets manufacturers' highest requirements and expectations. The lead-free PRECIOSA MC Chaton Rose VIVA 12® was chosen by G.S.M. and PRECIOSA because it is of the purest, brightest and highest quality. With an exceptional cut and brilliant optical-aesthetic properties, its resilience and high processing quality makes Sticky Crystal by PRECIOSA Crystal Components suitable for applications and use in extreme heat, water, and with detergents and other many other potentially damaging substances.

3 EASY AS 1 – 2 – 3

Decorating items with Sticky Crystal by PRECIOSA Crystal Components is so easy, anyone can do it. Just peel, stick and instantaneously create a sparkingly bejewelled creation! With our simple directions, applying Sticky Crystal by PRECIOSA Crystal Components is a snap. But its ease of use doesn't end there. If you wish to remove it, it will leave no signs or damage to the surface to which it was applied. Your product can thus easily be redecorated!

4 INFINITE POSSIBILITIES

The versatility of Sticky Crystal by PRECIOSA Crystal Components presents an infinite potential for even the most demanding designer, while simplifying production. In our catalogue we offer prefabricated crystal applications, but you can, of course, design your very own custom creation. It is the perfect way to decorate and enrich objects with a singular, stylish elegance and can be applied to an incredibly wide range of industries and objects. With just a bit of imagination you can embellish just about any surface from plastic, to metal, wood, ceramics, glass, and even paper. About the only thing you cannot apply it to is your skin or textiles (for textiles we have our regular Flat Back and Sew-on assortment).

5 ECO-FRIENDLY

PRECIOSA is a European company that believes in preserving the environment. We enforce environmentally safe working conditions and utilize ecologically responsible technologies. You can rely on MC Chaton Rose VIVA 12® by PRECIOSA: it complies with the most stringent international standards (including REACH, RoHS*, OEKO-TEX Standard 100, EN 71-3, CPSIA, CPSC 16 CFR 1303, ASTM F2923-11, ASTM F963-11).

* Except for Citrine, Coral, Garnet, Hyacinth, Light Siam, Olivine, Siam, Sun.

**WITH STICKY CRYSTAL BY

PANEL FORMATS

USUAL PUNCH-OUT FORMAT

Our catalogue items come on a standard 320×230 mm sheet which is perforated into pre-defined sections. This allows you to sell either the entire sheet or smaller groups of Sticky Crystal stones to your customers. Should this format not suit your needs, we can customize the perforations according to your specifications (see below).

CUSTOM PUNCH-OUT FORMAT

The standard 320×230 mm sheet can be perforated in any way you wish. The perforations can be made to your exact dimensions or design – you can even subdivide the sheet into individual stickers, if that is what you need. To order a Custom Punch-Out Format please contact your dedicated PRECIOSA Sales Representative.

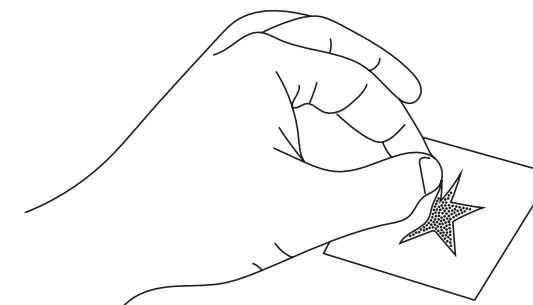

DIRECTIONS FOR USE

HOW TO APPLY STICKY CRYSTAL BY PRECIOSA CRYSTAL COMPONENTS

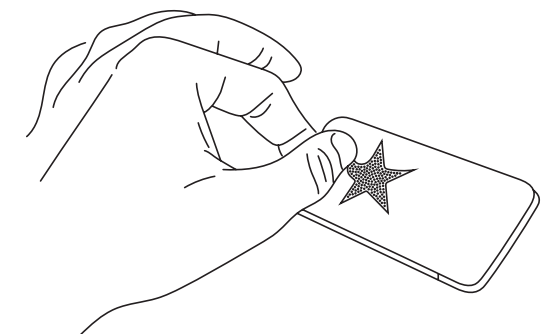

In order to ensure the product adheres perfectly to the surface of your object, the object must be clean, without any dust or residue, and without any trace of oil-based or silicon compounds.

If you position the product incorrectly, you can remove it by lifting it delicately from the surface onto which it has been applied and pulling it carefully. Make sure you keep the angle of contact with the surface less than 90°.

Although we test Sticky Crystal by PRECIOSA Crystal Components to the best of our knowledge, we cannot reasonably foresee every possible future use and application. Therefore, it is necessary, before you apply the product to your object, to test it on a sample object or on a small portion of it as the suitability of the product may be affected by your object surface's properties, by the way in which your product will be used, etc.

STEP 1: Carefully remove the Sticky Crystal by PRECIOSA Crystal Components from its backing.

STEP 2: Apply the Sticky Crystal by PRECIOSA Crystal Components on the object to be decorated, in the desired location.

WARNING:

CHOKING HAZARD – SMALL PARTS. Product contains small parts and functional sharp points. Not for children under 8. Not for consumption. Product not intended to be applied to the body. Adult supervision required.

TESTING FOR ADHESION

INTRODUCTION

Quality control testing on STICKY CRYSTAL by PRECIOSA Crystal Components was performed in accordance with international protocols. The tests were performed in French laboratories, designated by GSM, that specialize in fashion, cosmetics and glassworks. They were conducted by professional technicians in the requisite environments adapted for these tests. **A total of 12 tests were performed on a variety of surfaces including glass, plastic, metal and cardboard. The test details and results are summarized below.**

TESTS #1-8: RESISTANCE TO LIQUID EXPOSURE AND IMMERSION

1. Immersion in water for 48 hours
2. Immersion in water and ice for 8 hours
3. Immersion in white wine and champagne at room temperature for 24 hours
4. Exposure to drops of white wine and champagne over 24 hours
5. Immersion in red wine at room temperature for 24 hours
6. Exposure to drops of red wine over 24 hours
7. Immersion in sparkling red wine at room temperature for 24 hours
8. Exposure to drops of sparkling red wine over 24 hours

When the product was immersed in a coloured liquid, particularly in the sparkling red wine, it came out slightly darkened, with a slightly stained ring around each of the chatons. Although barely noticeable to the naked eye,

a delicate wipe with a soft non-corrosive cloth eliminated the ring and the product was brought back to its original state. All other tests were successful with no reported defects.

TEST #9: RESISTANCE TO DAMPNESS AND HUMIDITY

9. Tested in a humid pressure cooker type environment at a temperature of 80 °C for 2 hours (T=0 when pressure indicator pin rose). The test was repeated four times, with a 10 minute break in between each repetition. The product was then allowed to cool and dry for 8 hours.

After 8 hours, once the chaton roses and the backing had completely cooled down and dried, the chatons were unchanged and remained firmly adhered.

TEST #10: RESISTANCE TO COLD

10. Tested at -18 °C in a freezer for 48 hours.

Once the product returned to room temperature the chaton roses and the backing were unchanged and remained firmly adhered.

TEST #11: MECHANICAL ABRASION – NORMAL DAILY USE

11. The adhesive backing on the chaton roses and the digital printing process were tested for:

- Manual friction
- Mechanical friction
- Ageing as a reaction to UV/artificial lighting and natural light

All three tests were successful and no defects were reported.

TEST #12: PRODUCTION QUALITY CONTROL TEST – SIZE VARIATION AND COLOUR STABILITY

12. Measurement of product dimension and colour and printing quality included:

- Dimensions and permitted tolerances were measured and compared to declared values (deviation of ± 0.5 mm);
- The quality of the product design cut was inspected for cleanliness, accuracy and neatness; and
- The quality of the printing was tested for visible changes in printer colour (colour consistency and stability).

The products were examined both by the naked eye and under a digital microscope. No large or small defects were reported. In each instance the product was within declared tolerances, and cut to a high standard. There were no visible colour variations during the test. The product could be used and applied without problems as per product applications instructions.

OTHER RECOMMENDATIONS

When applying STICKY CRYSTAL by PRECIOSA Crystal Components onto or over a pre-existing logo, in particular on transparent or translucent surfaces (e.g. a glass bottle), the original logo may be visible under the applied chaton roses. This is especially true if lighter crystal component colours are chosen. We therefore suggest that you apply onto areas of the object where there are no logos or other pre-printed information. Alternatively, to minimize this effect, we suggest you choose dark chaton rose colours when issues such as these are present.

We also cannot guarantee or accept responsibility if STICKY CRYSTAL by PRECIOSA Crystal Components is not applied according to our Directions for Use guidelines.
